Kathy Rubel Deep Creek to Antarctica Wednesday July 17th Following the Pitch In

Laura Smith learned how to sail on the lake in the early 90's with the Deep Creek Sailing School in optimists and lasers. Kevin Rissell taught her how to tie her first bowline. Fede, Laura's husband, holds a master's mariner's licence and has been at the helm of everything from tankers to fishing boats, to his own sailboat. He has also sailed single handed across the Atlantic. Now Laura and Federico, with their company, Quixote Expeditions, take

passengers to Antarctica on their sailboat Ocean Tramp and motor vessel, Hans Hansson. Laura and Fede will share with the yacht club members how Fede built his boat that they took to Antarctica on their first journey, lessons learned while blue water sailing, and some of the exciting science that they've done along the way - as well as their amusing adventures.

Sunday Laser Racing

Starting this Sunday as long as we have volunteers we will have a separate race course for the laser racing at the same time as the flying Scott's are racing. This is part of the regular DCYRA program and separate from the Sunday Open Sail.

We encourage our teen sailor to take this opportunity to race on smaller race course away from the flying Scott's.

We are encouraging all of our experienced laser sailors to keep an eye out for the younger sailors even giving pointers and encouragement as they sail by. In the event that we do not have volunteers for a separate course we will make an announcement by VHF radio channel 19 prior to the 1/2 hour horn so that racers have time to get to the FS race course where they can race. For more information or if you would like to assist with this, please contact Mark Haraway mharaway@gmail.com or Eric von Eckartsberg (703) 598-8105.
